# Food Hygiene

All food is prepared in our main kitchen by a qualified cook. Staff are all aware of the importance of hand washing and using the hand gels, prior to food preparation or serving food. The staff wash the younger children's hands prior to them eating and the older children are taught about the importance of hand washing before eating. This encourages the children to do it independently but staff are always available to remind the children. Tables and chairs are wiped with antibacterial spray after every meal and before if needed, if they have been used for different activities.
