Oral Health

We operate a supervised tooth brushing programme. Most of our staff have undertaken the necessary training. This is shared with any new member of staff during their induction, they receive the relevant information so they can carry out this activity with the children.

Your child will brush their teeth once a day whilst at nursery. He/She will have their own personalised toothbrush which will be stored hygienically and safely.

The brushes are changed every 3 months or sooner should the need arise.

You will be required to sign a consent form prior to your child taking part in the programme, this is included in the induction pack.
